

YourCube - big ideas for small spaces.

YourCube means having choices. Inspired by minimalistic, natural and sustainable living, we want to give you beautiful, smart and mindful alternatives to traditional homes and lifestyle spaces.

Our range of tiny and not-so-tiny, modular timber frame houses comes in four sizes and various models to create your home, guest lodge, granny flat, office, yoga/creative studio, café, market stall...The options are endless. Just choose your optimum size and style that fits your space, purpose and budget.

Going small means, you focus on what really matters. Thanks to a smart design and layout, our cubes maximize the space without compromising comfort, luxury and style, despite its size. Our love of contemporary and clean designs combined with natural materials gives each YourCube model a unique and cosy look & feel.

With over 20 years of experience, German-born architect, Jeanette Schachler, followed her passion and made a dream come true with this YourCube collection. Supported by a great team of creative minds and artisans, YourCube is now a proudly German-Swiss-South African collaboration.

Since we are constantly looking for new, innovative ways of building and integrating sustainable living, you can expect to hear much more from us in the future.

If you want to bring your small space to life - let's have a chat!
